**The smart
way we work**

INTRODUCTION

Welcome to Landall Services

One Partner. All the Possibilities.

An independent production press consultancy with **over 50 years of experience** in the print sector. We help businesses identify innovation opportunities and recommend bespoke solutions.

Our solutions are tailored to businesses that are looking to **deliver efficiency** improvements through workflow automation, **reduction in operating**

costs, and more **flexible solutions** for their production ecosystem. This approach allows us to move away from commodities and to better protect your investment.

We underpin all services with a world-class support desk, certified engineers, and a data-driven approach. It is with this excellent support that we're able to distinguish ourselves from the competition.

CONSULTANCY

Introducing **1ANDALL** (Landall)

One Partner. All the Possibilities.

Unlike traditional providers tied to a single manufacturer, our independence allows us to offer the best print technology for your specific needs. As a truly impartial partner, we provide access to **1andall** - offering the full range of products from all leading manufacturers. Whether you require high-speed digital presses, advanced finishing equipment, automation tools, or finance, we deliver a consultative approach to ensure the right solution for your business.

Our name is rooted in the belief that every commercial print business deserves easy access to the best—"1andall." That means one expert partner, delivering all the industry's leading production print technologies without bias, compromise, or unnecessary complexity.

Hardware, Software and Finance Support Underpinned by the Very Highest Level of Service.

**Don't make your next
production print purchase
without expert advice.**

STOP

Supporting Your Entire Print Ecosystem

We go beyond just supplying machines. Our consultancy approach supports every stage of the production print workflow:

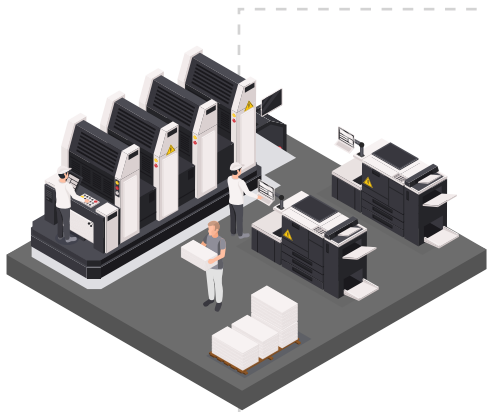

Sales, Marketing, and Finance

Amplify your creative output with advanced omnichannel marketing technology that seamlessly integrates your online and offline media. At the same time, enhance operational efficiency with intelligent automation across finance, sales, HR, and other vital business functions.

Prepress / Creative team

Streamline your design-to-print workflows with expert automation, seamless software integration, and precise colour management. Our solutions enhance efficiency, reduce errors, and ensure consistent, high-quality results from concept to print, all while optimising productivity and cost-effectiveness.

Printroom

Maximise uptime with proactive maintenance, expert technical support, and automatic toner replenishment. Our solutions minimise disruptions, reduce downtime, and ensure seamless printroom operations, keeping your production running smoothly.

Postpress / Finishing

Enhance your finishing capabilities with reliable, high-performance solutions that deliver precision, faster turnaround, and superior quality. From cutting to binding, our solutions ensure consistent, high-standard results to meet your production needs.

SERVICE

Comprehensive Managed Service

Our comprehensive production print managed services are designed to drive innovation and profitability in every aspect of your operation. From prepress innovation to printroom efficiency and postpress excellence, our solutions are designed to help you achieve your business goals.

With access to all major manufacturers, you have the freedom to choose the solutions that best align with your business needs—ensuring optimal performance, full compatibility with your existing infrastructure, and maximum return on investment. Benefit from competitive pricing and comprehensive support for all your equipment, whether provided through direct manufacturer channels or our trusted network of accredited partners.

Our combined approach to direct and indirect support means you'll always receive timely, expert assistance, regardless of the brand, giving you the confidence that your technology is fully backed at every stage.

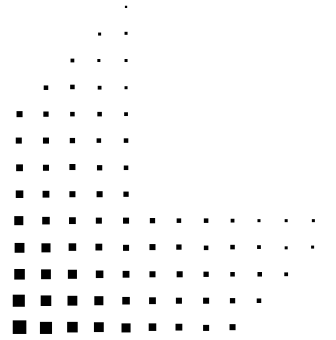

The **TANDALL** Promise

Impartial guidance for **all** manufacturers' technology, no bias

SERVICE

Cutting-edge features that drive performance

Helpdesk Support

The first line of defense, providing rapid, expert support to troubleshoot and resolve issues, quickly.

Direct+ Indirect Engineers

Our in-house and manufacturer-trained engineers, delivering the highest level of on-site support to minimise downtime.

Nationwide Coverage

With expert teams positioned across the UK, we're always close by - ensuring fast, effective support when you need it.

Consumables Supply

Automated toner monitoring and replenishment ensure seamless print operations and reduce the risk of downtime

Project Management

Seamless deployment of new print solutions with minimal disruption to your print operations.

Integrated Sustainability Monitoring

Track and measure environmental impact with integrated monitoring, empowering your business to meet environmental goals.

Manufacturer Independent (IANDALL)

As a manufacturer independent provider, we offer impartial recommendations for all leading-OEMs, tailored to your needs.

Consultative Procurement Process

We analyse your print needs and recommend the best-fit technology, with no bias.

NEW

Rapid Response Unit

At the heart of our commitment to **exceptional service** is our Rapid Response Unit, an **agile extension of our Helpdesk team**. This specialised unit **leverages cutting-edge AI** and automation tools to ensure that every customer service request is triaged and prioritised with precision and speed.

- AI ticket routing
- Accelerate issue resolution
- Maintain high levels of efficiency and accountability
- Deliver responsive, reliable support

FINANCE

Funding Your New Production Press

When innovation moves faster than depreciation, why lock your business into rigid, long-term capital commitments?

That's why Landall Services offers tailored financial solutions designed to be highly competitive. Whether you're looking to preserve capital, scale with demand, or avoid the risk of technological obsolescence, our finance options are built to align with your strategic goals - empowering you to invest with confidence.

We'll help you decide how best to acquire your new production equipment, most often showing you the benefit to HP, leasing or purchase. Whatever you decide to do, **we'll help make the process simple** and easy to understand. Often **removing the overly complicated jargon** when financing your equipment, we'll source the best funder that works for your business needs - **helping you get your funds cleared at a competitive rate.**

Funders we partner with

The benefits of financing your equipment

1

Tax efficiency

Some types of equipment finance are more tax efficient than buying outright. That's because when you lease an item it's a monthly expense rather than an asset sitting on your balance sheet.

2

Easy to budget

Equipment finance in most of its forms gives you predictable payments so you can spread the cost over time. It makes managing cash flow that little bit simpler, and then you can focus on running your business.

3

Flexible / scalable

If you finance one piece of equipment and your business starts growing, you can get more items quickly without a large outlay. If you're ramping up production equipment finance is a great way to grow.

4

Access to other lines of credit

An often-forgotten reason to finance over purchase is access to other lines of credit. For similar reasons to tax efficiency, equipment finance is usually a predictable expense, which means you can get other types of business finance.

Helping you increase your profitability

As well as conventional finance products, we can help you find alternative funding, using new loan providers and styles of funding. **We know the lenders who offer the most competitive rates** for the sector.

Whether you have a straightforward finance need, or require a complicated 'Jigsaw' funding plan made up of a combination of products, **we can work with you to find the best solutions for your business.**

PREPRESS

Before the Press - We Impress

Enhancing Your Prepress as part of your Ecosystem

A truly efficient production print operation isn't just about the presses - it's about the entire print ecosystem. Our Prepress & Postpress Managed Services ensure that every stage of your workflow operates seamlessly, reducing inefficiencies, improving quality, and enhancing sustainability.

Prepress is where print quality is determined. We help businesses streamline file preparation, automate workflows, and ensure colour accuracy, improving speed and reliability across the entire print process.

**A fully connected print ecosystem
- from prepress to postpress**

XMPie®

PersonalEffect® Platform: Elevating Personalisation

The flagship product, the PersonalEffect® platform, is the peak of personalised marketing excellence. By seamlessly integrating customer data with dynamic content creation, PersonalEffect® enables production print managers to deliver tailored communications across print and digital channels.

- **Variable Data Printing (VDP)**
- **Web-to-Print Storefronts**
- **Cross-Media Campaign Management**
- **Analytics and Reporting**

ePS MDSF

Transform Your Print Business with Web-to-Print

ePS MarketDirect StoreFront (MDSF) is a powerful web-to-print and eCommerce solution that enables print businesses to offer a seamless, online ordering experience. Whether you're serving B2B or B2C customers, MDSF provides a branded, user-friendly storefront that integrates with your existing production workflow, ensuring efficiency from order placement to fulfilment.

- **Branded Online Storefronts**
- **Personalised & Variable Data Printing**
- **Seamless Integration**
- **Scalable eCommerce Solution**

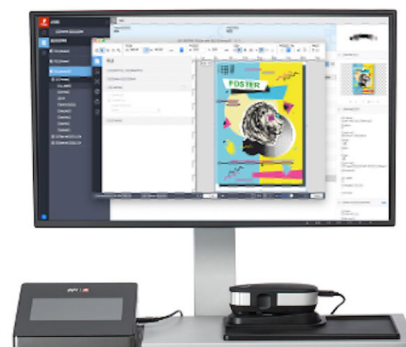

Fiery®

Fiery Digital Front Ends (DFEs): Leading the Way in Print Control

The flagship product, Fiery DFEs, serves as the nerve centre of digital printing, delivering precise control and optimisation for a wide range of printing devices. From entry-level systems to high-end production presses, Fiery DFEs ensure unparalleled performance and reliability, empowering production print managers to meet the demands of today's dynamic printing landscape.

- **Advanced Colour Management**
- **Streamlined Workflow Automation**
- **Variable Data Printing (VDP) Support**

PRINTROOM

Advanced Printroom Technology

Helping Shaping Tomorrow's Printroom, Together

Our consultative approach is designed to drive innovation and profitability in every aspect of your operation. From prepress innovation to printroom efficiency and postpress excellence, our solutions are designed to help you achieve your business goals.

You'll benefit from a tailored service designed to engage all key stakeholders, fostering collaborative discussions around the unique needs and objectives of your business. Our approach encompasses everything from 'direct-from-source' pricing - ensuring transparency and value - to comprehensive assessments of future printroom environments, including the cutting-edge technologies shaping their evolution.

MyMiniFactory

"We see the relationship with Landall Services as more than just a business contract; it's a partnership built on trust, innovation, and shared success. We couldn't be happier with our experience, and we look forward to continuing our journey together towards even greater heights of success."

Digital Presses

One partner. Five powerhouses. Endless potential.

Experience a new standard of productivity with our state-of-the-art colour production presses. These production presses are built on a proven and reliable colour technology platform with enhanced automation and extensive media-handling capabilities.

High-speed and high-colour prints, all day, every day

Business expansion

Enhance your capabilities with additional colours, sheet types and substrates.

Protect your investment

Utilise your investment more effectively, with optional equipment additions.

Environment evolution

Eco-friendly colour printing, with automatic paper offsetting software.

Workflow automation

Increase efficiency with optional inline, nearline or offline finishing options.

Canon imagePRESS C270

Whether you are an SME, creative agency or work in an in-house print environment, this printer easily combines everyday business requirements with creative output to broaden your print capabilities.

Features

- Print speed: C270 70ppm
- Paper weight 300 gsm
- Print resolution 2,400 x 2,400 dpi
- Paper supply capacity (A4 80gsm) Max 7050 sheets
- Finishing options: staple, booklet, insertion, & punch

The quality of a professional device, the **ease of use of an office printer**. One solution that makes it easy for you to do more.

Canon imagePRESS V900 Series

A superb range of production presses with speeds of up to 90ppm and flexible media handling of up to 350gsm.

Features

- Print speed: V900 90ppm, V800 80ppm and V700 70ppm
- Paper weight up to 350 gsm
- imagePRESS Kit, PRISMAsync, EFI imagePRESS Server
- Optional 100 page booklet maker up to 399gsm cover
- 1,300mm simplex for book dust jackets & 4 fold leaflets

Made for environments where speed, **offset-like quality**, **versatile print capabilities** and day-in, day-out **reliability** are always in demand.

Canon imagePRESS V1000 Series

Amplify the profitability of your mid volume print environment. Grab the opportunity to meet diverse customer demand with fresh thinking.

Features

- Simplex & duplex print speed Up to 100ppm
- Paper weight 52 - 400 gsm
- Wide range of finishing capabilities
- Supporting media sizes from A6 - SRA3
- Auto-duplex printing up to 1,300mm

Built on a **reliable technology** platform, **harnessing innovation** and automation to produce a wide range of applications on different media sizes, types, and weights – all at speed.

Canon imagePRESS V1350 Series

An exceptional high-performer, the Canon imagePRESS V1350 series helps print service providers turn customer challenges into profitable opportunities and outstanding services.

Features

- Simplex & duplex print speed Up to 135ppm
- Paper weight 60 - 500 gsm
- Print on coated, recycled, uncoated, synthetic
- Up to 1.2 million AMPV and 1.8 million duty cycle
- Media up to 762mm (auto-duplex) or 1,300mm (simplex)

Designed to optimise **end-to-end productivity** for **high-volume production environments**, so you can always deliver – on time and with the highest quality.

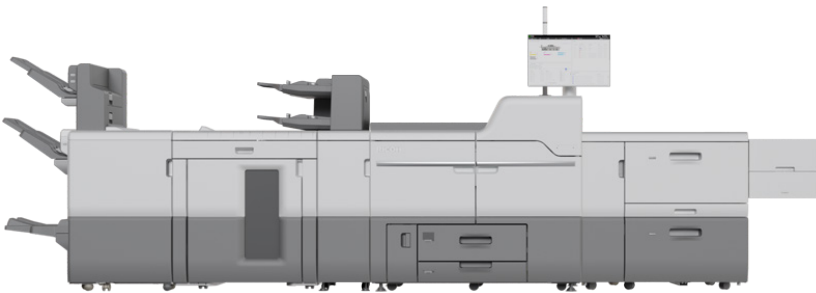

Ricoh Pro C5310s Series

The C5300s & Pro C5310s, built as the right-sized solution, combining high-quality colour, exceptional media handling, powerful performance, and a range of finishing options, along with professional print speeds.

Features

- Print Speed: C5300 65ppm & C5310 80ppm
- Paper weight: 52 - 360 gsm
- Print resolution: 1200 x 4800 dpi
- Finishing: staple, booklet, insertion, folding & punch
- Maximum printable area: 323 x 480 mm

The Pro C5300s Series offers **exceptional quality** and handling at an **affordable price**.

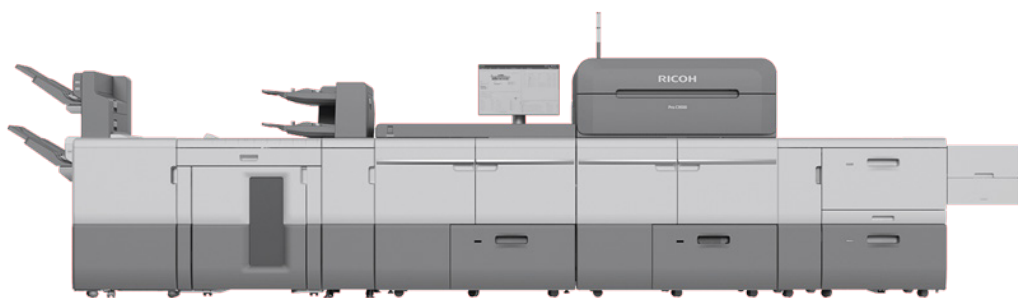

Ricoh Pro C7500 Series

The Pro C7500 systems can be tailored to meet all your production needs. Newly enhanced inline feed and finishing options to meet your workflow demands.

Features

- Print Speed: 95ppm
- Paper weight 40 - 470 gsm
- Print resolution: 2400 x 4800 dpi
- Paper input capacity: Maximum 16,200 sheets
- Maximum printable area: 323 x 1,252 mm

With the Pro C7500s Series, you can keep more jobs in-house with superb quality that ensures color and brand consistency.

Ricoh Pro C9500 Series

This sheet feed press offers the essential capabilities for a successful offset-to-digital migration: quality comparable to offset, high reliability for long runs, generous paper capacity and extensive media support.

Features

- Print Speed: C9500 135ppm
- Paper weight 40 - 470 gsm
- Print resolution: 2400 x 4800 dpi
- Optional 200 page Plockmatic booklet finisher in-line
- Paper input capacity: Maximum 18,100 sheets

The Pro C9500 systems adapt to your production needs with a modular design supporting various inline feed and finishing options.

Funding Advice & Service Options

Collaborate with our finance and service experts to explore flexible funding models and full-service support packages.

In partnership with

Xerox PrimeLink® C9281 Series

The Xerox® PrimeLink® C9281 Series redefines flexibility in the light production space, delivering vibrant colour output, powerful workflow automation, and broad media handling – all in a compact footprint.

Features

- Print speed up to 81 ppm colour / 85 ppm black-and-white
- Paper weight support from 52–350 gsm
- Print resolution up to 2400 x 2400 dpi
- Recommended monthly volume of 30,000 – 150,000 pages
- Maximum monthly duty cycle up to 400,000 pages

Delivers **exceptional colour fidelity**, flexible media options, and **specialty toner capabilities** (including gold, silver, white, clear, and fluorescents with the Xerox® Adaptive CMYK+ Kit) to give your business a competitive edge in short-run and personalised print.

Xerox Versant 280 Series

The Xerox® Versant® 280 Press delivers the most adaptable capabilities on the market: Unmatched application flexibility, unsurpassed image quality, professional-grade finishing, enhanced reliability and security, plus advanced tools and automation.

Features

- Print speed up to 80 ppm (A4) and 32ppm (A3)
- Paper weight (A4) 52-400 gsm, (A3), 221-400 gsm
- 2400 x 2400 dpi VCSEL ROS for sharpness
- Mixed-stock jobs supported
- Media dimensions 330 mm x 660 mm

The all-in-one, ever-evolving, field-proven **profit builder**. Reimagined to deliver everything you need in a mid-production press.

Xerox Versant 4100

A Versant press reinvented, the top mid-production press with even more smart automation for virtually touch-free quality control, and extended application options with the ability to print on media as heavy as 400 gsm* and XLS sheets as long as 1.2 m.

Features

- Print speed up to 100 ppm (A4) and 52 ppm (A3)
- Paper weight 52-400 gsm
- Print resolution 2,400 x 2,400 dpi
- 250,000 pagers per month recommended volume
- High-capacity feeding, stacking, and finishing

With the simple 'Scan, Load, and Go' workflow on the Xerox® Versant® 4100 Press, you achieve optimal output, saving time and reducing costs.

Xerox Iridesse

The Xerox® Iridesse™ Production Press offers all the hallmarks of a digital press – personalisation, economical short runs, and agile production – enhanced by new high-value inline capabilities that allow you to combine stunning four-colour imagery with up to two Specialty Dry Inks in a single pass.

Features

- Print speed up to 120 ppm
- Paper weight 50-400 gsm
- Print resolution 2,400 x 2,400 dpi x 1 bit
- 4, 5 and 6 production colour printing
- 225,000 - 475,000 pagers per month recommended volume

Delivers **more “wow” impact** per printed page through digital **speciality enhancements** and Colour FLX Technology.

Konica Minolta AccurioPress C4080 Series

The AccurioPress C4080 series is a fully configured press to expand your business as you wish. You can print flat sheets, duplex long sheets of up to 864mm, or directly finish prints inline with our extensive choice of finishings.

Features

- Print speed up to 81 ppm (A4) and 45 ppm (A3)
- Paper weight 60 - 400 gsm
- Print resolution 2,400 x 3,600 dpi x 8 bit
- Media up to 864mm (duplex) or 1,300mm (simplex)
- 50-sheet booklet making with front trimming and optional creasing, slitting and spine corner forming

AccurioPress operators enjoy easy setup, a reliable paper path, high productivity, and automated image stability.

Konica Minolta AccurioPress C7100

Introducing the AccurioPress C7100 series, packed with innovative technologies that will ignite your success. From intelligent automation and enhanced finishing to flawless quality, advanced capabilities and exceptional durability, now you have the power to grow your business.

Features

- Up to 100 A4 colour pages per minute
- Paper weight up to 400 gsm
- imagePRESS Kit, PRISMAsync, EFI imagePRESS Server
- 50-sheet booklet making with front trimming
- Media up to 900mm (duplex) and 1,300mm (simplex)

AccurioPress C7100 and C7090 were designed for greater profitability with a press that works smarter, not harder.

Konica Minolta AccurioPress C14000

With its speed of up to 140 ppm, the AccurioPress C14000 simply does the job, day after day – printing with consistency, reliability, ease and efficiency on a wide array of media.

Features

- Print speed up to 140 ppm (A4) and 80 ppm (A3)
- Paper weight 52 - 450 gsm
- Print resolution 2,400 x 3,600 equiv. dpi x 8 bit
- Media up to 900mm (duplex) or 1,300mm (simplex)
- 50-sheet booklet making* with front trimming and optional creasing, slitting and spine corner forming

The AccurioPress C14000 stands out with exceptional print quality, impressive media flexibility, and advanced automation.

Konica Minolta AccurioPress C14010

The Konica Minolta AccurioPress C14010 is built for high-demand production environments where speed, consistency, and automation are essential. Delivering outstanding image quality at accelerated print speeds, it's designed to drive productivity while minimising operator intervention.

Features

- Print speed up to 140 ppm (A4)
- Paper weight support from 52–450 gsm
- Print resolution of 3600 x 2400 dpi equivalent with 8-bit processing
- Up to 13,000-sheet paper input
- Monthly duty cycle up to 2.5 million pages
- Optional Intelligent Quality Optimizer (IQ-501) for automated colour calibration

The AccurioPress C14010 delivers high-volume colour production with industry-leading automation and uptime. Its intelligent media sensor, real-time inline quality adjustments, and wide finishing compatibility (booklets, perfect binding, trimming, and more) make it a powerful tool for expanding print capabilities and streamlining operations.

Fujifilm ApeosPro C810

The ApeosPro C810 is a high-performance multifunction printer that bridges the gap between office and production printing. It combines precision color output with flexible finishing options, making it a great choice for businesses needing both professional-grade prints and everyday document production.

Features

- Print speed: Up to 81 pages per minute (A4)
- Resolution: 2400 x 2400 dpi for detailed image reproduction
- Paper weight support: 52 to 350gsm, including specialty media
- Maximum paper size: 330 x 1300mm for extended banner printing
- Media feeding system: Multi-feed trays with air-assisted feeding

Versatile media handling, supporting extra-long banners (up to 1300mm) and specialty media while maintaining fast, reliable output.

Fujifilm Revoria Press SC180

A compact yet powerful digital press designed for small to mid-sized print operations. The Revoria Press SC180 provides reliable performance, vibrant colors, and flexible media handling, making it an excellent choice for businesses with diverse printing needs.

Features

- Print speed: Up to 80 pages per minute (A4)
- Resolution: 2400 x 2400 dpi for high-quality imaging
- Paper weight range: 52 to 350gsm, including coated and textured media
- Maximum sheet size: 330 x 1200mm for banners
- Toner technology: Super EA-Eco toner with low-temperature fusing

Exceptional image stability and precision, with Super EA-Eco toner for ultra-smooth gradients and fine details.

Fujifilm Revoria Press SC285S

Designed for quick turnaround and in-house print production, the Revoria Press SC285S balances compact size with outstanding print quality. Its five-color engine and eco-friendly toner make it a great choice for businesses seeking vibrant, professional-grade output.

Features

- Print speed: 85 pages per minute
- Five-color print engine with metallic ink options
- Vertical Toner Development Technology for a compact footprint
- Eco-friendly Super EA-Eco toner for vibrant prints
- Supports diverse paper types and sizes

Versatile media support, handling heavyweight stocks up to 400gsm and oversized sheets for creative applications.

Fujifilm Revoria Press EC1100

A versatile digital press that combines high-quality output with exceptional media flexibility. The Revoria Press EC1100 is designed to meet a variety of production demands, from commercial printing to corporate in-house applications.

Features

- Print speed: Up to 100 pages per minute (A4)
- Resolution: 2400 x 2400 dpi for sharp text and smooth gradients
- Paper weight support: Up to 400gsm (duplex printing supported)
- Maximum paper size: 330 x 1200mm (banners supported)
- Feeding capacity: Large-capacity feeder with air suction technology

High-speed 100ppm output with advanced automation, ensuring consistent quality across long print runs.

Fujifilm Revoria Press EC2100S

A high-performance digital press built for commercial and in-house printing, the Revoria Press EC2100S delivers exceptional speed, quality, and reliability. With advanced toner technology and automation features, it ensures consistent print results while optimising workflow efficiency.

Features

- Print speed: 100 pages per minute
- Five-color print engine with metallic color capability
- Compact design with Vertical Toner Development Technology
- Supports a wide range of media sizes and weights
- Super EA-toner for ultra-fine image quality

Fast 100ppm production with superior color consistency, thanks to built-in automated image quality management.

Fujifilm Revoria Press PC1120

A premium six-color production press designed for high-end commercial printing. With its advanced color management, extensive media support, and outstanding speed, the Revoria Press PC1120 is ideal for businesses looking to expand their print capabilities.

Features

- Print speed: 120 pages per minute with six-color capability**
- 2400 x 2400 dpi high-resolution printing
- Handles a wide range of media, including heavyweight stock
- Supports banner printing up to 330 x 1200mm
- Advanced automation for consistent color accuracy

6-color print engine, enabling gold, silver, pink, and clear toner enhancements for high-impact, premium-quality prints..

SUSTAINABILITY

Land All Your Sustainability Goals

Print. Measure. Recycle. Offset.

Turn your commitment to **sustainable product development** into a **competitive advantage**. Our end-to-end solutions **empower you to innovate responsibly**, enhance market positioning, and increase profitability — all while aligning with your environmental goals.

- + Paper Impact Reforestation**
Enabling production print companies to replace the trees consumed by their paper usage, linking every print job to verified reforestation initiatives.
- + Carbon Impact Offsetting**
Neutralise the carbon emissions generated during paper manufacturing by investing in verified carbon offset initiatives.
- + GHG Lifecycle Emissions Offsetting**
Mitigate the total greenhouse gas emissions generated across the entire lifecycle of their print hardware.
- + Toner Recycling**
Responsibly manage toner cartridge waste by ensuring that used cartridges are collected, recycled, and transformed into new products rather than ending up in landfills.
- + Sustainable Paper Supply**
Ensures that every sheet of paper used in your production print operations meets rigorous sustainability standards, from responsibly sourced raw materials to certified eco-friendly production processes.

PAPER SUPPLY PARTNERS

POSTPRESS

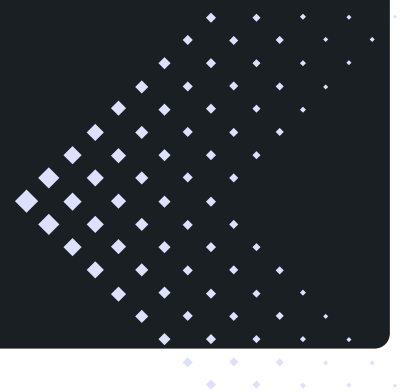

Print's Not Finished Until It's Finished

Wrap It. Trim It. Fold It. Finish It.

Postpress is where print transforms into the final product—whether it's a perfect-bound book, high-impact direct mail, or precision-cut packaging. Our postpress solutions ensure that every piece meets the highest standards of quality, efficiency, and cost-effectiveness.

We provide a full suite of finishing automation solutions, ensuring your binding, cutting, folding, and embellishment processes are as efficient as your print production. Our consultative approach helps you integrate the right technology to reduce manual handling, improve turnaround times, and enhance output quality.

A fully connected print ecosystem—from prepress to postpress

Vivid Matrix Series

The Matrix range does the entire job from start to gloss or matt finish. Designed to allow business to provide customers with a service previously outsourced, the Matrix is simple to use, easy to maintain, quick and reliable.

Features

- Max. Mechanical Speed (10m/33ft)
- Paper Thickness 135gsm +/-90lbs +
- Maximum Sheet Width up to 500mm/20"
- Max. Lamination Film Width 340mm/13" (MX-370), 500mm/20" (MX-530)

Applications:

- Business Cards
- Book Covers and Brochures
- Flyers and Marketing Materials
- Wedding Stationery and Invitations
- Bespoke Packaging

Vivid VeloBlade Series

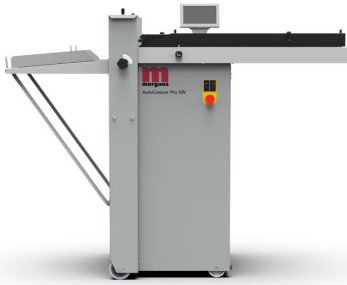

Automate your production, increase efficiency and diversify your business with the VeloBlade and Velo-Taper, a cut above the rest.

Features

- Digital Die-Cutting with No Physical Dies
- Automated Creasing, Perforating & Kiss Cutting
- VeloTaper: Patented Automated Tape Application
- High-Capacity Auto Sheet Feeding
- Smart Job Management with Barcode/QR Code Reading

Applications:

- Packaging Prototypes and Short Run Boxes
- POS Displays and Signage
- Labels and Stickers
- Greeting Cards and Invitations
- Business Cards and Marketing Collateral
- Bespoke Packaging and Prototypes

AutoCreaser Pro 50

The Morgana AutoCreaser Pro XW is the latest in Morgana range of high-speed creasers designed to eliminate the problem of cracking that occurs when folding digitally printed output. It is equally effective when creasing conventionally printed card, laminated or cross-grained stock.

Features

- Max. sheet size: 700 x 500mm (27.5" x 19.7")
- Max. paper thickness: 0.4mm (varies by substrate and fold type)
- Max. speed per hour: 11,000 (A5 in half) / 8,500 (A4 in half)
- Feeding system: Bottom suction feed
- Power requirement: 1 phase, 230V, 50/60Hz

Applications:

- Brochures and Book Covers
- Greeting Cards and Invitations
- Menus and Flyers
- Photobooks and Catalogues

DocuFold Pro

Equipped with the latest SmartScreen technology, it enables an operator with minimum training to carry out a variety of folds from an icon driven touch screen. An unlimited alpha numeric memory is available to store all standard and non standard jobs.

Features

- Powerful suction feeder
- 7" SmartScreen
- Side lay alignment of the sheets, prior to folding
- Fully enclosed fold plates. Fitted with anti-static brushes

Applications:

- Brochures and Flyers
- Letters and Mailers
- Menus and Programmes
- Greeting Cards and Invitations
- Newsletters and Bulletins

Duplo

Duplo DC-618 Slitter Cutter Creaser
